

COVID-19 Test Types

BinaxNow Rapid Test	PCR Screening - Students	PCR Screening - Employees
Test is completed onsite in 15 minutes.	Tests must be processed overnight at Willamette Valley Toxicology Lab. WVTL picks samples up at your student's school between 10 and 11 a.m. on Wednesdays.	Tests must be processed overnight at Willamette Valley Toxicology Lab. WVTL picks samples up at your site between 10 and 11 a.m. on Wednesdays.
Tests are administered in the isolation room at your students' school. Students must be able to swab their own nose. Students who cannot manage the swab are referred to a medical professional.	Tests are usually administered at home. Students could receive help from a parent or guardian at home.	Employees can administer the test at home. Test kits can be picked up in the school office.
Testing consent form must be signed and on file for the student. DSD2 Testing Consent Form	Google testing consent form must be filled out prior to the student being tested. DSD2 COVID-19 Screening PCR Testing Instructions	All permissions etc. are completed through the Labdash.net account.
Rapid tests do not travel well (must be kept flat after drops are placed in the test) and must be administered at the school.	Tests can be picked up in the office by a student or parent if they are signed up for the program.	Tests can be picked up in the school office by an employee if they are signed up for the program.
A negative rapid test can be used to clear a student in the test to stay program. Tests would need to be administered on day one and again on day six. If either test is positive, student would go into quarantine.	Families must set up a Labdash.net account for the sample to be processed. This test could also be used to clear a student for return to school if negative.	Employees must set up a Labdash.net account for the samples to be processed.
Vaccinated students can take this test if symptomatic.	Vaccinated students don't qualify for the weekly screening program, but could take the test if they are symptomatic.	Vaccinated employees do not need to screen weekly or quarantine, but could take the test if symptomatic. They would still need a Labdash.net account.
Test must be entered into the BinaxNow testing log: BinaxNow Testing Log	Do not mix with the employee tests when handing out to students and families. They must have the student version. Barcode does not start with DSD , but each individual building has it's own unique code.	Do not mix with the student tests when handing out to employees. They must have the employee version. Bar code starts with DSD.
